Standards of Care

for People Living with HIV
2013

The Evolution of HIV care

Modified diagram with thanks to Chu C, J Urban Health. 2011 June; 88(3): 556-566

Who are standards for?

- Service providers involved in the care of people with HIV.
- Commissioners with responsibility for purchasing care for people with HIV
- People with HIV – what should they expect to access
- And.....

Different audiences - similar priorities?

- Service providers
 - Individual and organisation focus, best outcomes, high quality, safety, budgets,
- Commissioners
 - Population focus, good outcomes, best practice, cost pressures, efficiency targets
- People with HIV
 - Individual and community focus, high quality, holistic, long term, supportive, trustworthy, safe, reliable.

Changing needs of people with HIV

- More people living with HIV
- Increasing diversity
- Changing pathology
- Advances in therapy
- Impact of HIV on work, finances, housing,

Commissioners and the Commissioned

- Different parts of the pathway will have different commissioners
 - National Commissioning Board
 - Local Authorities
 - Clinical Commissioning groups
- A.Q.P = Any Qualified Provider
 - Increasing range of providers
- Value for money

What should good care deliver?

- Life that is
 - as fulfilling as possible
 - for as long as possible
 - in the best possible health
- Maintaining health and wellbeing
- Sustaining and promoting relationships
- Staying safe and reducing risk

NHS Outcomes Framework 2012

Preventing people from dying prematurely

Enhancing quality of life for people with long term conditions

Helping people recover from an episode of ill health or injury

Ensuring people have a positive experience of care

Treating and caring for people in a safe environment and protecting them from avoidable harm

BHIVA Standards of care for people with HIV

Stakeholders

- Involvement of people with HIV in decisions about their care and their services

Martin Fischer and Gill Ereaut Health foundation 2012

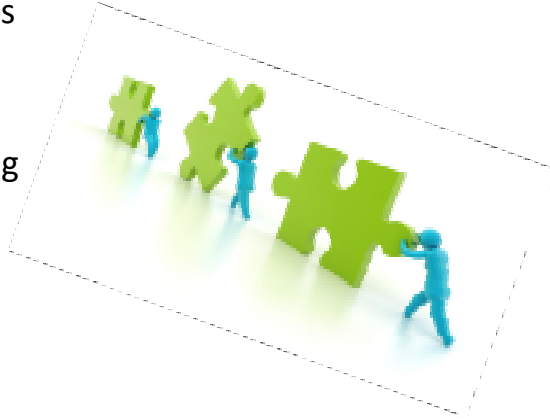

11 and 12 Skills and Data

- Care delivered by appropriately skilled people
- Information – using, sharing and generating data

What about implementation?

- Service specifications
- Joint strategic needs assessments
- Health and Wellbeing boards
- Payment by results
- National Audit
- CQUINS, QUOF
- Domain Directors
 - And.....

What does success look like?

- Auditable outcomes for each standard
- Biomedical and clinical outcomes
- Combined outcomes framework measures
- PROMs - Patient Related Outcomes
 - Watch this space.....
