

Professor Andrew Rice

Chelsea and Westminster Hospital, London

COMPETING INTEREST OF FINANCIAL VALUE \geq £1,000:	
Speaker Name	Statement
Prof Andrew Rice	Professor Rice is a member of the Scientific Advisory Board and owns share options in Spinifex Pharmaceuticals. He also has provided consultancy via Imperial College Consultants (last 36 Months) to Astellas, Asahi Kasei, Servier, Pfizer and Allergan. Professor Rice has also received grant funding (via IMI EUROPAIN) from Pfizer and Astellas
Date	November 2013

***BHIVA Best Practice Management Session:
Peripheral Neuropathy***

Persistent Pain

```
graph TD; A[Persistent Pain] --> B[Nociceptive Pain]; A --> C[Neuropathic Pain];
```

Nociceptive Pain

- Pain in response to a noxious stimulus
- Nociplastic: sensitivity to stimuli may be enhanced by inflammation

Neuropathic Pain

- Pain as a direct consequence of a lesion or disease affecting the somatosensory system
 - Absence of a noxious stimulus
 - No discernable biological function
 - Disorder of nerve repair/regeneration?

Key Features of Neuropathic Pain

- Pain occasionally generated in response to damage to sensory nervous system
- Pain in absence of a noxious stimulus:
 - Spontaneous continuous
 - Spontaneous paroxysmal (lancinating)
 - Evoked (stimulus dependant) pain

- Prevalence UK & France ~ 7%¹
- Usually severe and chronic:
 - Mean duration 78 months
 - Mean pain intensity 6/10

1 Torrance et al 2006; Smith et al 2007; Bouhassira et al 2008
2 Backonja & Stacey 2004

- Variably associated with sensory perturbations:
 - **Sensory Loss:**
 - Pain in areas of sensory loss - *Anaesthesia Dolorosa*
 - **Sensory gain:**
 - *Allodynia* – pain in response to an innocuous stimulus
 - *Hyperalgesia* – increased response to a painful stimulus
 - *Hyperpathia* - increased response a repetitive noxious stimulus, often associated with an increased threshold.

Range of Underlying Diseases Associated with Neuropathic Pain

- Trauma to nervous system
- Peripheral neuropathies
 - Metabolic, dietary & toxic
- Infection
- CNS disease
- Tumours
- Nerve compression
- Genetic channelopathies

- Neuropathic pain
- HIV-associated neuropathy
 - **Epidemiology**
 - (Pathogenesis)

 - Treatment

The Pain Consortium

Classification of HIV-1 Associated Peripheral Neuropathies

(After Verma J. PNS 2001;6:8-13; Keswani AIDS 2003 16;2105-2117)

- Early stages (immune dysregulation)
 - Acute inflammatory demyelinating polyradiculopathy
 - Chronic inflammatory demyelinating polyradiculopathy
 - Vasculitic neuropathy
 - Brachial plexopathy
 - Cranial mononeuropathy
 - Multiple mononeuropathies
- Mid and late stages (HIV-1 replication driven)
 - HIV-Associated distal sensory polyneuropathy
 - Autonomic neuropathy
- Late stages (opportunistic infection & malignancy)
 - CMV polyradiculopathy
 - CMV mononeuritis multiplex
 - Acute herpes zoster/ post herpetic neuralgia
 - Syphilitic radiculopathy
 - Tuberculosis polyradiculomyelitis
 - Lymphomatous polyradiculopathy
 - AIDS cachexia neuropathy
- All stages
 - Antiretroviral toxic neuropathy
 - Other drugs (eg vincristine, ethambutol, thalidomide)
- Other causes e.g.
 - Nutritional (B12, B6)
 - Alcohol, diabetes etc

HIV-Sensory Neuropathy
(HIV-SN)

HIV-Sensory Neuropathy

(HIV - Distal Sensory Polyneuropathy & Antiretroviral Toxic Neuropathy)

- Distal symmetrical axonal sensory polyneuropathies
- Length dependant - Distal degeneration "die back" of axons without major loss/apoptosis of DRG cells
- Often associated with neuropathic pain
- Clinically indistinguishable
- High prevalence persists despite modern ARVs

HIV-Sensory Neuropathy Prevalence

(Smyth *et al* HIV Medicine 2007;8:367–373)

	<u>1993</u> Pre- CART N = 94
HIV-SN Prevalence	13%
Any Pain	?
Pain > 5/10	?
Using NRTI	-
Ever used NRTI	-

HIV-Sensory Neuropathy Prevalence

(Smyth *et al* HIV Medicine 2007;8:367–373)

	<u>1993</u> Pre-CART N = 94	<u>2001</u> CART- dNRTI era N = 140
HIV-SN Prevalence	13%	44%
Any Pain	?	74%
Pain > 5/10	?	37%
Using NRTI	-	62%
Ever used NRTI	-	82%

HIV-Sensory Neuropathy Prevalence

(Smyth *et al* HIV Medicine 2007;8:367–373)

Melbourne outpatient sample,
n=100

	<u>1993</u> pre CART N = 94	<u>2001</u> CART- dNRTI era N = 140	<u>2006</u> CART – post dNRTI era N = 100
HIV-SN Prevalence	13%	44%	42%

Pain > 5/10	?	37%	43%
Using NRTI	-	62%	8%
Ever used NRTI	-	82%	62%

Risk factors for DSP

- **Age** (Smyth *et al* 2007; Wright *et al* 2008)
- **Height** (Cherry *et al* 2008; Affandi *et al* 2008)
- **CD4 nadir <200** (Ellis *et al* 2010; Maritz *et al* 2010; Banerjee *et al* 2011)
- **Exposure to dNRTIs** (Cherry *et al* 2007; Smyth *et al* 2007; Wright *et al* 2008)
- **Genetic** (Cherry *et al* 2008; Affandi *et al* 2008)

HIV-Sensory Neuropathy Prevalence

	Location	n	Evidence of neuropathy	Pain in neuropathy patients	Risk factors
Pettersen et al 2006	Canada	221	46%	-	Age, peak viral load, Protease Inhibitors (?hyperglycaemia) & dNRTI exposure
Smyth et al 2007	Australia	100	42%	43%	Age, height, dNRTI exposure
Ellis et al 2010 (CHARTER)	USA	1539	57%	38%	Age, lower CD4 nadir, current cART use, past dNRTI exposure
Mauritz et al 2010	South Africa	598	49%	47%	Age, TB, ART use (esp d4T), CD4 nadir <200
Wadley et al 2011	South Africa	395 (Stavudine treated)	57% (symptomatic)	76%	Age, height
Banerjee et al 2011	USA	436	27%	?	Age, height, CD4 nadir, elevated triglycerides (statin or protease inhibitor use), type 2 diabetes

Prevalence of HIV-SN

Australia: Smyth et al., 2007; **Malawi:** Beadles et al., 2009; van Oosterhout et al., 2005; **South Africa:** Hitchcock et al., 2008; Maritz et al., 2010; Wadley et al., 2011; **SE Asia:** Affandi et al., 2008; Sithinamsuwan et al., 2008; Vivithanaporn et al., 2010; Wright et al., 2008; **Uganda:** Nakasujja et al., 2005; **USA:** Ellis et al., 2010; Simpson et al., 2006

Genetic Risk Factors for HIV-SN

	Australia ¹	Indonesia ²	USA & Italy ³
Increased risk of neuropathy	TNFA-1031*2	TNFA-1031*2	MTND2* LHON4917G
Decreased risk of neuropathy	IL12B(3'UTR)*2		

1. Cherry et al., *AIDS Res Hum Retroviruses* 2008;24: 117-123
2. Affandi et al., *AIDS Res Hum Retroviruses* 2008;24: in press
3. Canter et al *Pharmacogenomics J* 2007; 8.;71-72..

Ethnicity and Genes Associated With HIV-SN Risk

	<i>TNFA-1031</i>*2 (increased SN risk)	<i>IL12B(3'UTR)</i>*2 (reduced SN risk)
White	✓	✓
Indonesian (Malay)	✓	✗
African	✗	✗

Affandi et al., *AIDS Res Hum Retroviruses* 24: 1281-1284, 2008; Cherry et al., *AIDS Res Hum Retroviruses* 24: 117-123, 2008; Wadley et al., unpublished data.

GP120 Hypothesis

HIV GP120 interacts with chemokine receptors to induce axonal degeneration of sensory neurones

Natural History of HIV-1 infection

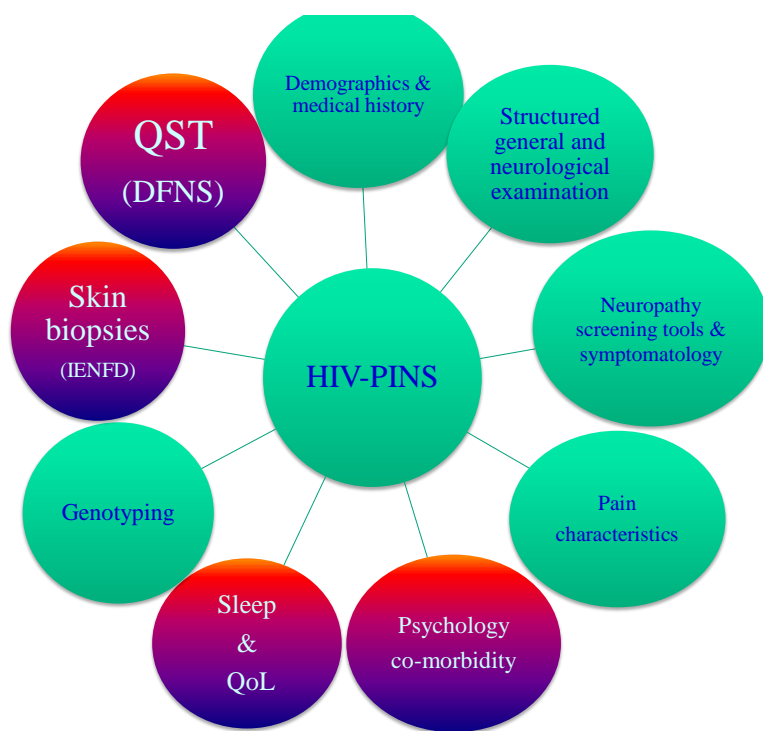

Untreated infection >90% mortality ~8-10 years post infection

Luzzi, G. A. et al.

Diagnosis & Assessment of Neuropathic Pain

Haanpaa et al. Pain 2011;152:14-27.

1. Investigation of underlying disease.
 2. Is there a lesion or disease of the somatosensory system?
 3. Is the pain neuropathic?
 4. How severe is the pain?
 5. What is the impact of the pain?
- 

CHANT – Clinical HIV-associated Neuropathy Tool

- Diagnostic Instrument for Assessment of HIV-SN in:
 - Routine clinical practice, incl. resource-restricted settings
 - Clinical trials
 - Large scale epidemiological/genetics studies

HIV-SN Diagnostic Sensitivity and Specificity of Individual HIV-PINs Measurands

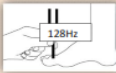

Yohannes Woldeamanual

CHANT – Clinical HIV-associated Neuropathy Tool

The purpose of this questionnaire
This questionnaire is designed to assist the diagnosis of HIV-associated peripheral neuropathy, assess the likelihood of any pain being neuropathic in origin, and describe the intensity and characteristics and impact of the neuropathic pain.
Triage for Tools
The following tool has been developed within an algorithm to answer the following four questions systematically.
1. <i>Does the patient have neuropathy?</i>
2. <i>Is the pain neuropathic?</i>
3. <i>What are the severity and characteristics of the pain?</i>
4. <i>What is the impact of the pain?</i>

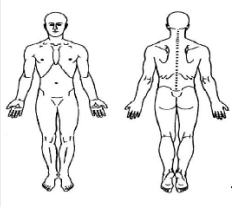

CHANT – Clinical HIV-associated Neuropathy Tool

The purpose of this questionnaire
This questionnaire is designed to assist the diagnosis of HIV-associated peripheral neuropathy; assess the likelihood of any pain being neuropathic in origin, and describe the intensity and characteristics and impact of the neuropathic pain.
Triage for Tools
The following tool has been developed within an algorithm to answer the following four questions systematically.
1. Does the patient have neuropathy?
2. Is the pain neuropathic?
3. What are the severity and characteristics of the pain?
4. What is the impact of the pain?

Does the patient have neuropathy?		
	Right	Left
Subjective measures (Interview)		
Ask if the patient has foot pain 0 = no foot pain 1 = has foot pain		
Ask if the patient has foot numbness 0 = no foot numbness 1 = has foot numbness		
Objective measures (Examination)		
Vibration test at great toe 0 = normal 1 = diminished/absent 		
Ankle reflex 0 = normal 1 = diminished/absent 		
Total Score		
Total Score Both Sides		

CHANT – Clinical HIV-associated Neuropathy Tool

The purpose of this questionnaire
This questionnaire is designed to assist the diagnosis of HIV-associated peripheral neuropathy, assess the likelihood of any pain being neuropathic in origin, and describe the intensity and characteristics and impact of the neuropathic pain.
Triage for Tools
The following tool has been developed within an algorithm to answer the following four questions systematically.
1. Does the patient have neuropathy?
2. Is the pain neuropathic?
3. What are the severity and characteristics of the pain?
4. What is the impact of the pain?

To address question #2 Is the pain neuropathic?
Part I
Using the following body map, please ask the patient to shade the areas where pain is felt.

CHANT – Clinical HIV-associated Neuropathy Tool

The purpose of this questionnaire
This questionnaire is designed to assist the diagnosis of HIV-associated peripheral neuropathy, assess the likelihood of any pain being neuropathic in origin, and describe the intensity and characteristics and impact of the neuropathic pain.
Triage for Tools
The following tool has been developed within an algorithm to answer the following four questions systematically.
1. Does the patient have neuropathy?
2. Is the pain neuropathic?
3. What are the severity and characteristics of the pain?
4. What is the impact of the pain?

Part II DN4-Interview ¹		
Interview	YES	NO
Does the pain have one or more of the following characteristics?		
Burning		
Painful cold		
Electric shocks		
Is the pain associated with one or more of the following symptoms in the same area?		
Tingling		
Pins and needles		
Numbness		
Itching		
Total Score [Yes = 1 point, No = 0 point]		

Please refer to Appendix II for scoring.

Douleur Neuropathique 4 Questions (DN4)
Bouhassira et al Pain 2005;114:29–36

Clinical Assessment of HIV-SN In High Resourced Specialist Setting

- Evidence of neuropathy?
 - Structured neurological examination
 - Symptom and sensory profiling
 - Diagnostic criteria - 2/3 of:
 - Decreased IENFD on skin biopsy
 - Evidence of axonal neuropathy on NCS
 - > 2 abnormal QST findings
- Exclude other causes of sensory neuropathy
 - Diabetes
 - Chemotherapy
 - Neurology opinion if in doubt
- Is pain neuropathic?
 - Pain drawing
 - DN4 questionnaire

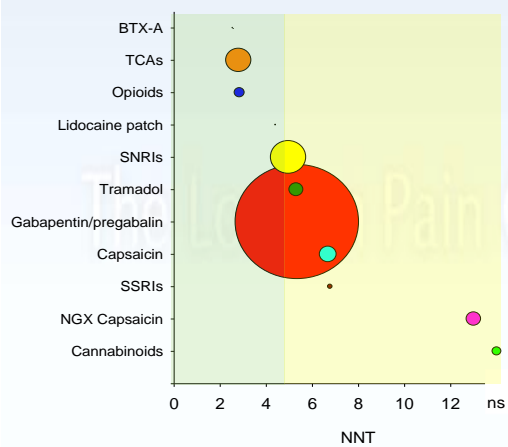

Questionnaire DN4	
Questionnaire 1 to 4 items Question 1: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 2: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 3: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 4: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 5: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 6: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 7: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 8: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 9: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 10: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 11: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 12: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 13: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 14: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 15: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 16: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 17: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 18: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 19: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 20: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 21: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 22: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 23: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 24: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 25: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 26: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 27: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 28: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 29: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 30: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 31: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 32: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 33: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 34: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 35: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 36: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 37: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 38: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 39: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 40: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 41: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 42: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 43: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 44: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 45: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 46: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 47: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 48: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 49: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2	
Question 50: Are there any numbness or tingling in your hands/feet? 1. Never 0 2. Sometimes 1 3. Often 2

The Pain Consortium

Meta-analysis of RCTs in Peripheral Neuropathic Pain

Finnerup et al Pain 2010;150:573-851

- Primary therapy for underlying neuropathy and disease
- Drug therapy for alleviation of pain:
 - Evidence to support use of:
 - Tricyclic antidepressants & duloxetine
 - Gabapentinoids
 - Opioids

 - Topical local anaesthetics
 - Topical capsaicin 0.075% & 8%

Meta-analysis of RCTs for Analgesic Efficacy in HIV-SN

Phillips TJC et al PLoS ONE 2010;5: e14433

Efficacy

- **NGF (s.c.)** (McArthur 2000)
- **Capsaicin 8%** (Simpson 2008)
 - (NNT_{30%} 6.46)
 - (NB Simpson et al 2012)
- **Smoked cannabis** (Abrams 2007; Ellis 2008)
 - NNT_{30%} 3.6
 - NNT_{30%} 3.5

No Evidence

- **Opioids**

No Efficacy or Minor Effect

- **Amitriptyline** (Kiebertz 1998; Shlay 1998)
- **Mexilitine** (Kiebertz 1998)
- **Acupuncture** (Shlay 1998)
- **Peptide T** (Simpson 1996)
- **Capsaicin 0.075%** (Paice 2000)
- **Prosaptide** (Evans 2007)
- **Acetylcarnitine** (Youle 2007)
 - Efficacy in EE population
- **Lamotrigine** (Simpson 2000 & 2003)
 - Efficacy for ATN patients
- **Gabapentin** (Hahn 2004)
- **Pregabalin** (Simpson 2010)
