**UK Guideline for the use of HIV Post-Exposure Prophylaxis  
Following Sexual Exposure (PEPSE)  
2015**

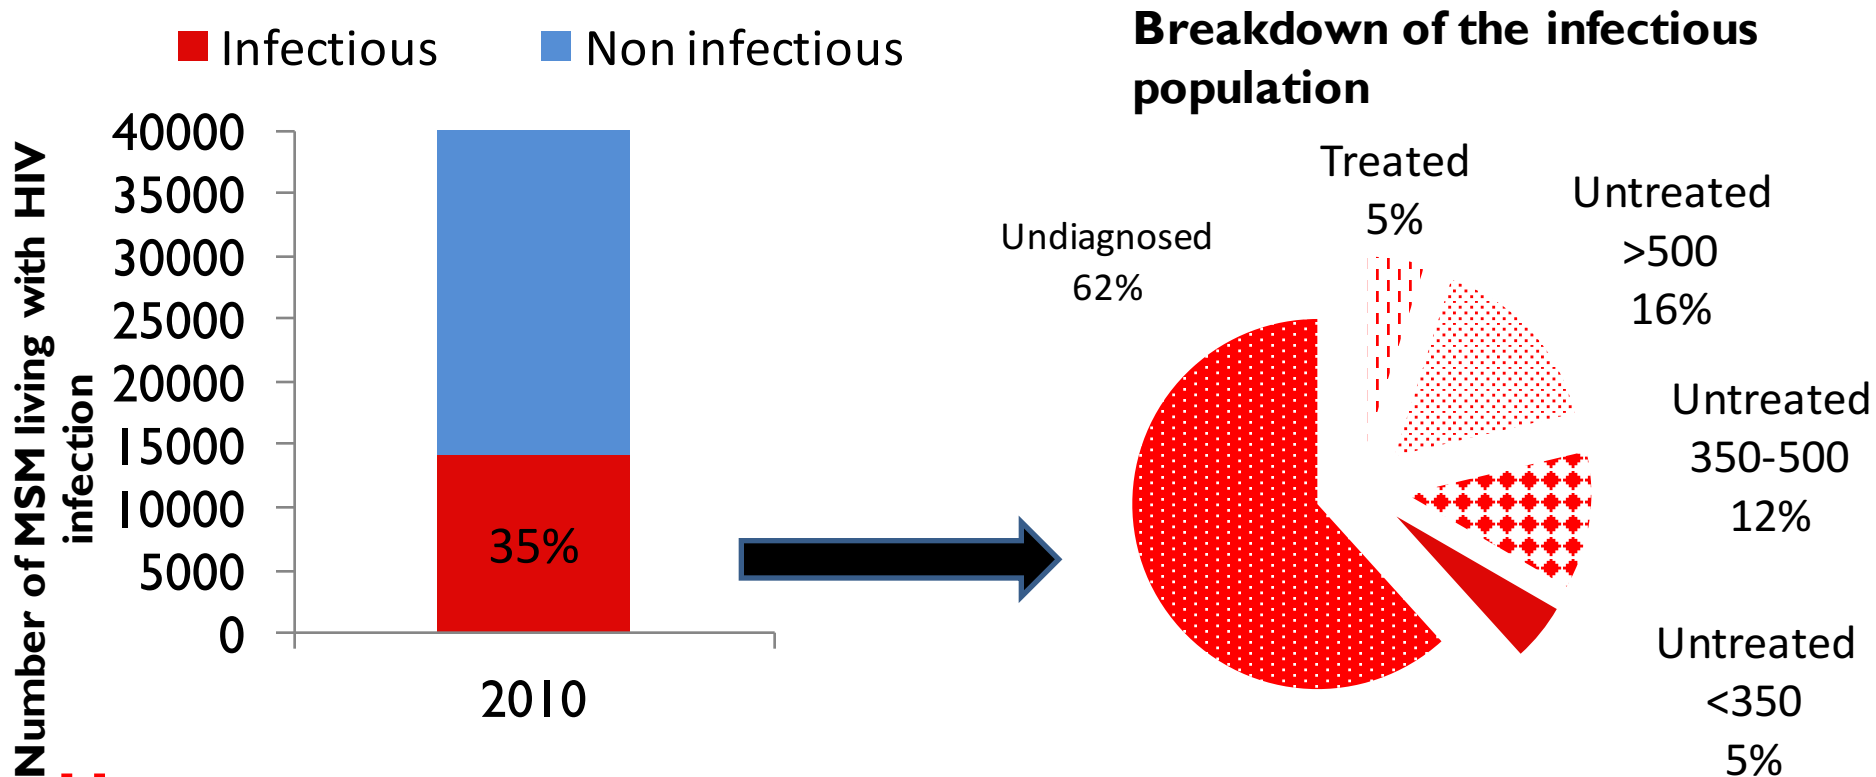

# Knowledge of transmission risk with VL<40 in START at baseline

- “A person using HIV treatment with an undetectable viral load”:
  - Cannot transmit HIV = 6.9%
  - Is much less likely to transmit = 28%
- 20% recruited before 2012
- No association with calendar year of recruitment

# Distribution of infective MSM \* among HIV-infected MSM, UK: 2010

**Undiagnosed MSM assumed to have same distribution of viral load as untreated MSM in their first year of diagnosis**

# *ignorance (noun)*

lack of knowledge, experience, information or education: the opposite of wisdom

CD4 ))

“Life is really  
simple,  
but we insist  
on making it  
complicated.”  
– Confucius
