THE CONVERSION

Affordable Health Care Act

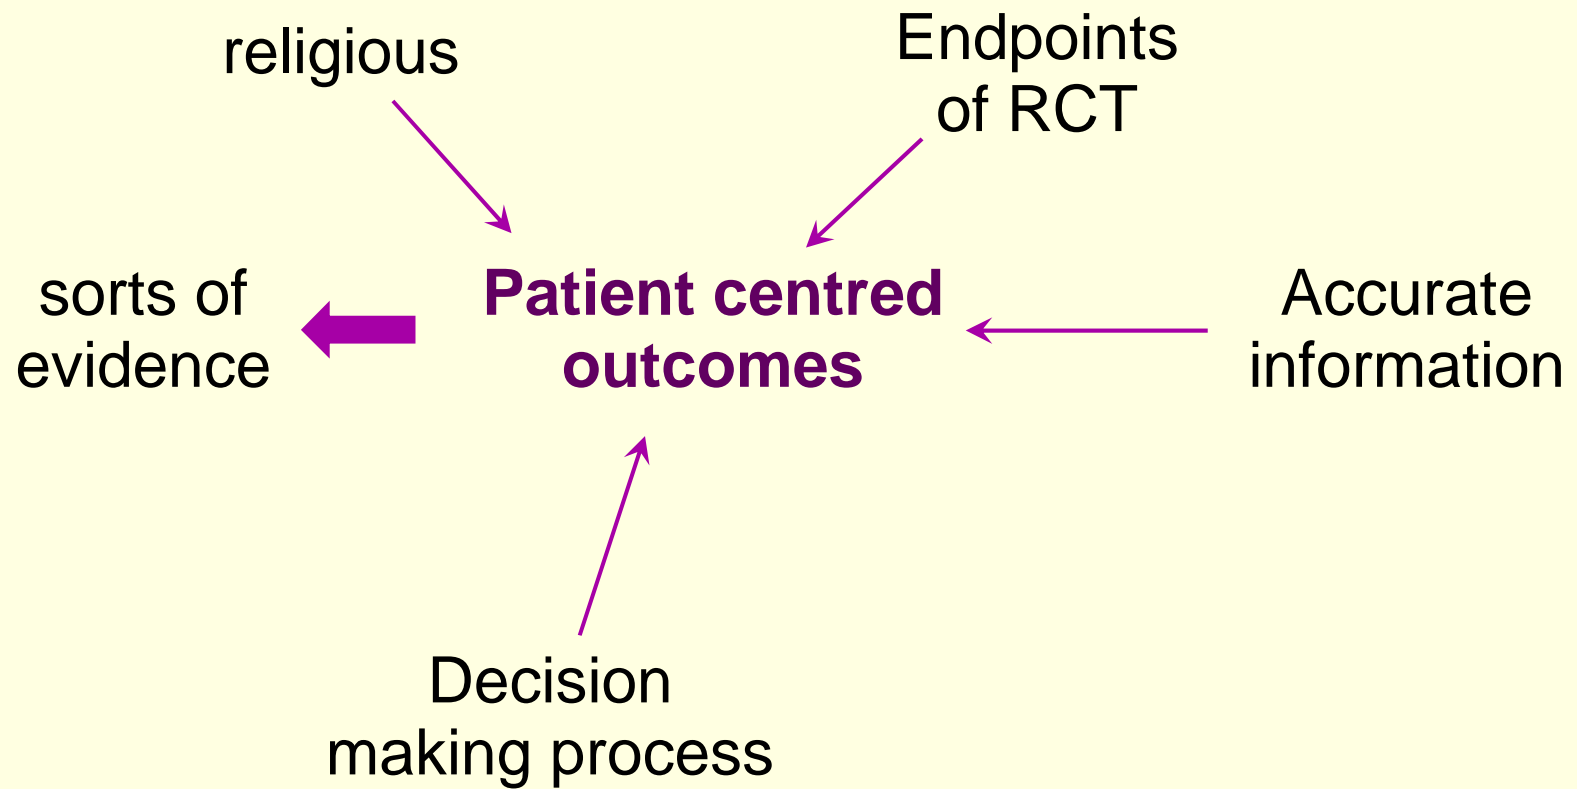

PCORI

Grant money (lots of it!!)

PCORI

Why HIV?

Ageing population

Major disparities in outcome

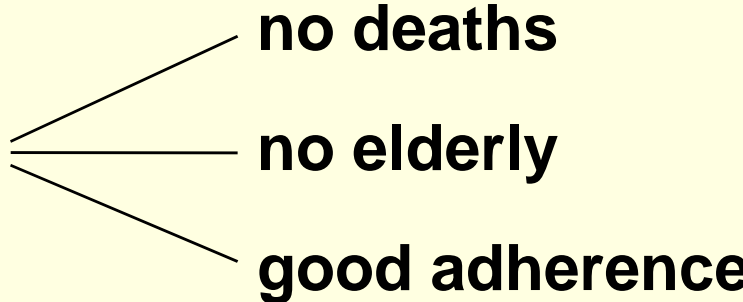

Complexity of care

Changes in healthcare systems

Marginalised and disadvantaged population

R.C.T.

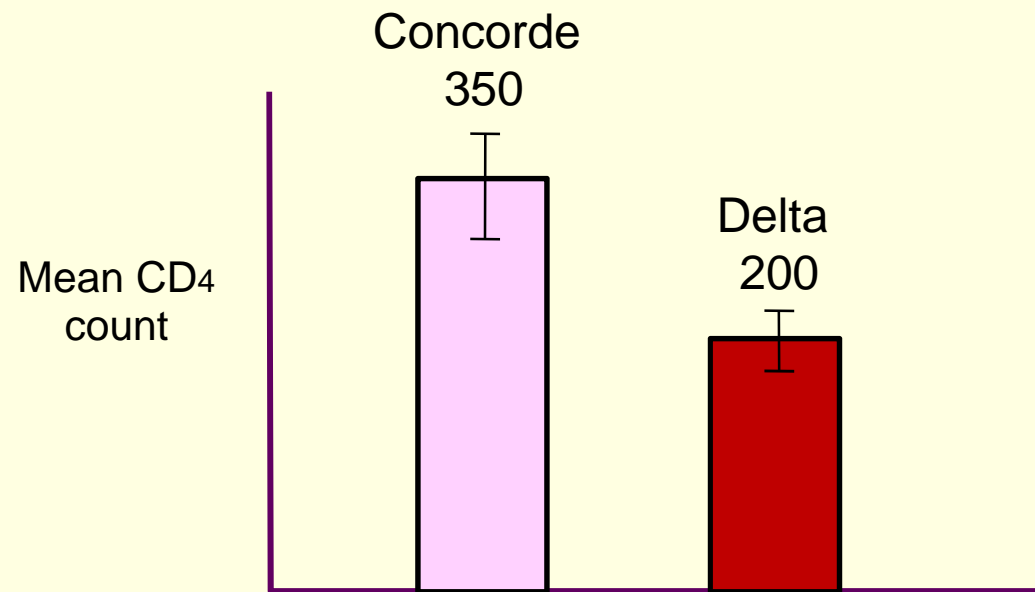

No bias

Entry criteria 

- no deaths**
- no elderly**
- good adherence**

End points

Recruitment of patients

ITT analysis

Less toxic

More efficacious

Studies in the USA

40% IVDU

60% indigent

Only 60% remain undetectable

In N.C. Accord 40% deaths not HIV related

ECHO and THRIVE

Less toxic

Not more efficacious

ECHO ENTRY CRITERIA

34 NNRTI RAMS EXCLUDED

RA

TNF α antibodies v pills

superior RCT

**superior clinic
practice**

Observational cohort

Open / closed

Channelling bias

Loss to follow up

Danish Civil Registration System (1967)

- Date of death,
- Emmi- and imigration.
- Identity of parents and siblings

Danish Hospital Database (1977)

- Date of inpatient admissions and outpatient visits
- Diagnosis (ICD-8 until 1993, thereafter ICD-10)

Danish Registry of Prescriptions

Danish Cancer Registry (1943)

The Danish HIV Resistance Database

Danish HIV Cohort

Danish Pahology Registry

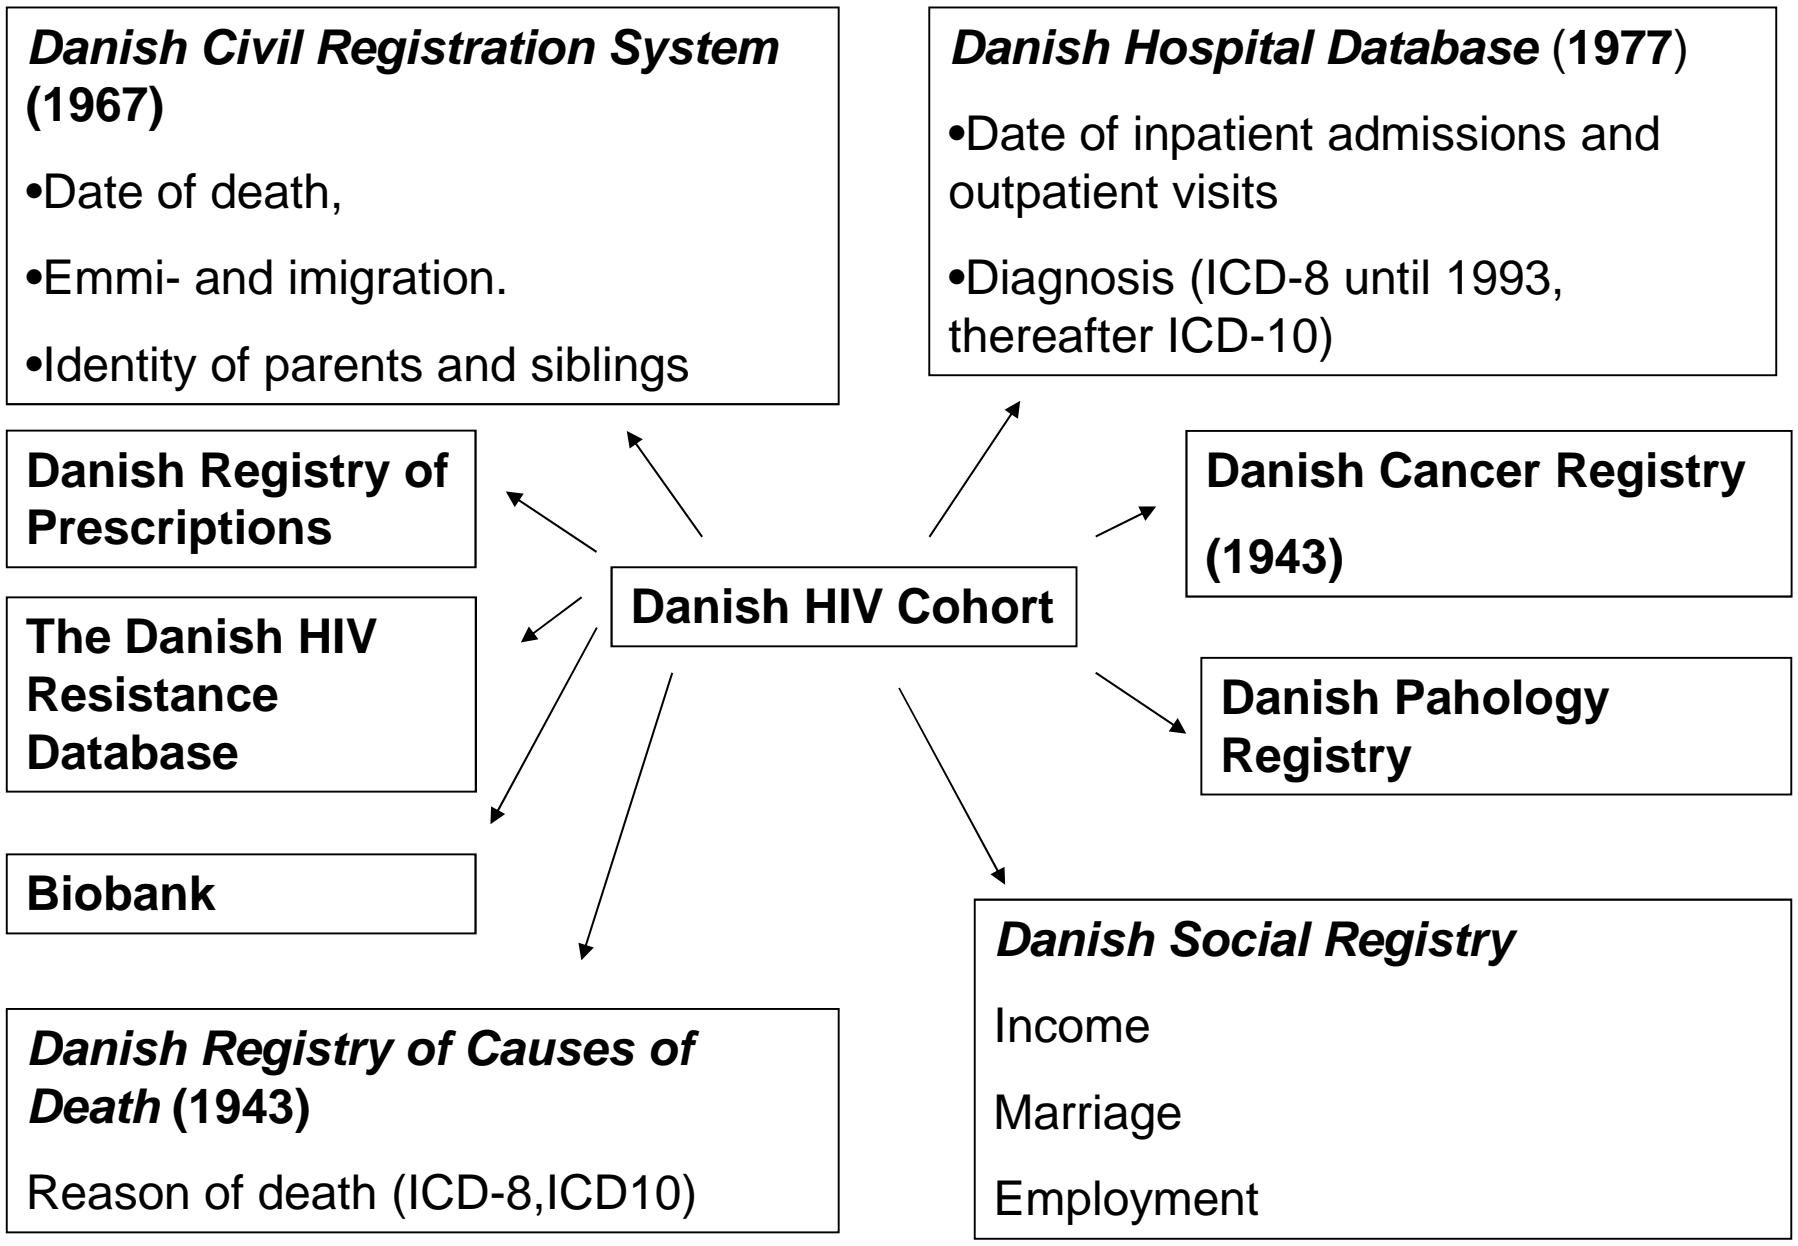

Biobank

Danish Social Registry

Income
Marriage
Employment

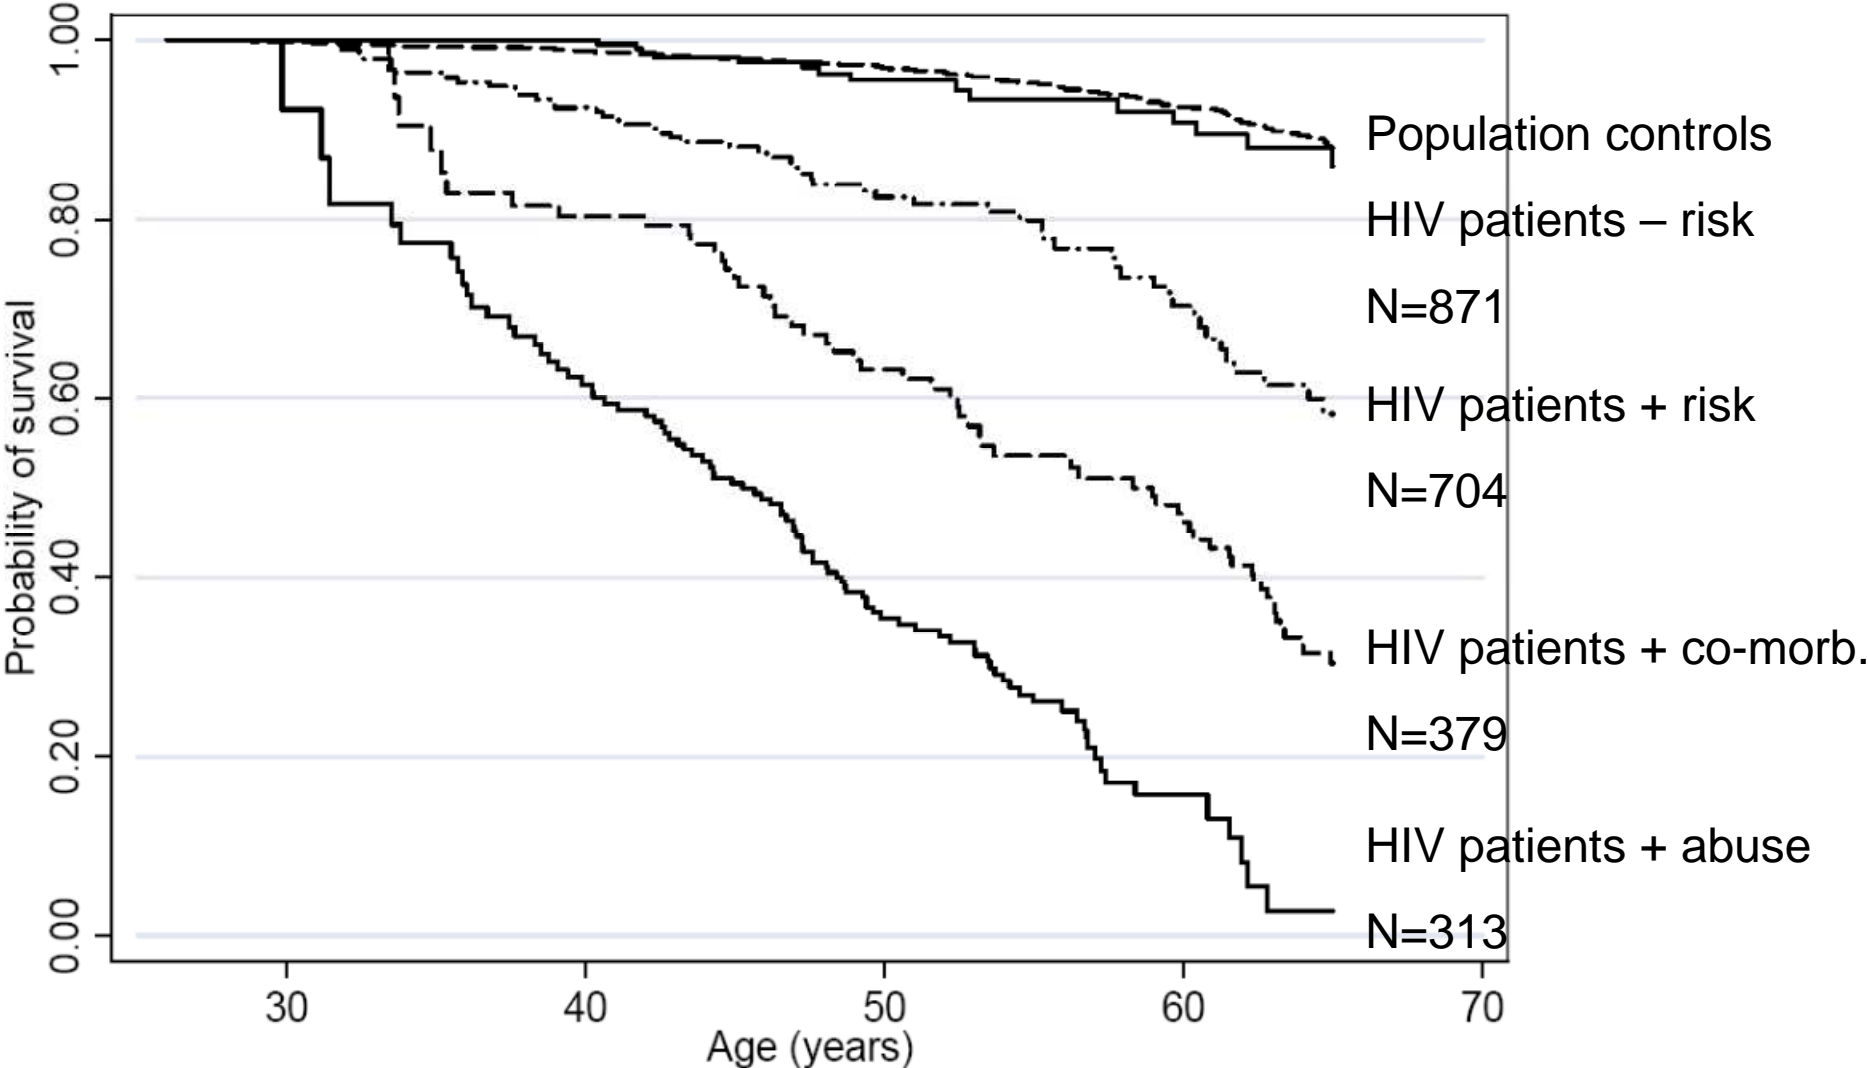

Danish Registry of Causes of Death (1943)

Reason of death (ICD-8,ICD10)

Mortality in HIV patients starting HAART after 1 January 1998 N=2267

And population controls, N=9068

Obel et al., PLoS One 2012

Causes of death among Danish HIV patients compared to population controls in the period 1995-2008

Incidence and impact on mortality of severe neuro-cognitive disorders in persons with and without HIV: a Danish nationwide cohort study

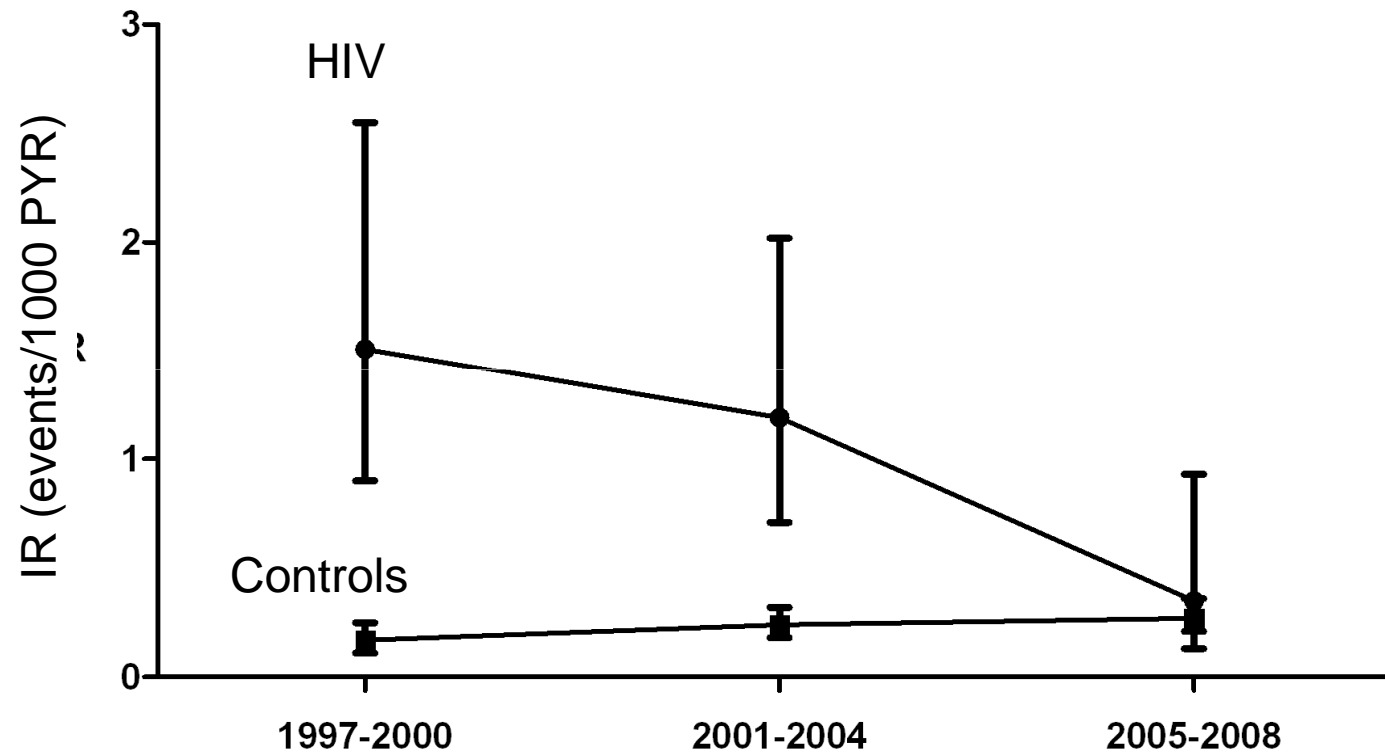

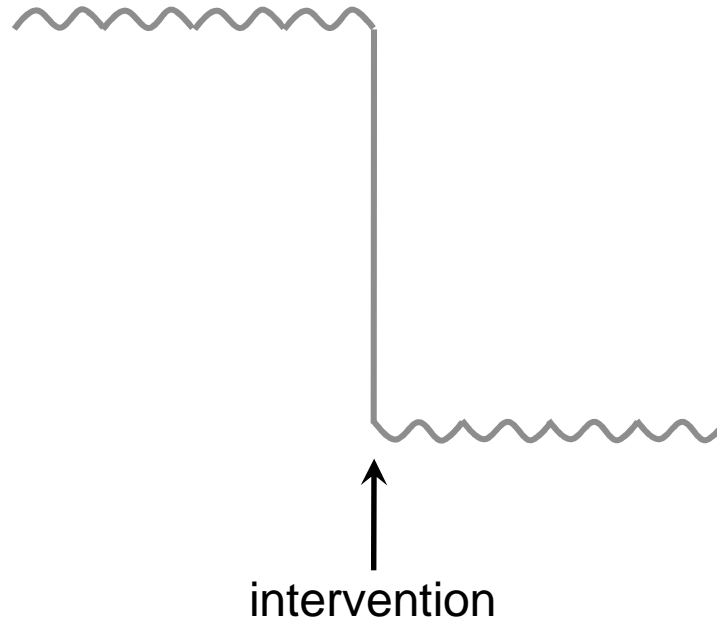

Figure 1: Incidence rates (IR) (per 1000 PYR, 95% confidence intervals) for severe neuro-cognitive disorders in HIV-infected patients (filled circles) and population controls (squares) by time periods; 1997-2000, 2001-2004 and 2005-2008.

Patient involvement in decision making

Patients were asked: how important is it for you to be involved in medical decisions?

Decision Aids

Paper based

Web based

Videos

outcomes:

knowledge

satisfaction

impact on decisions

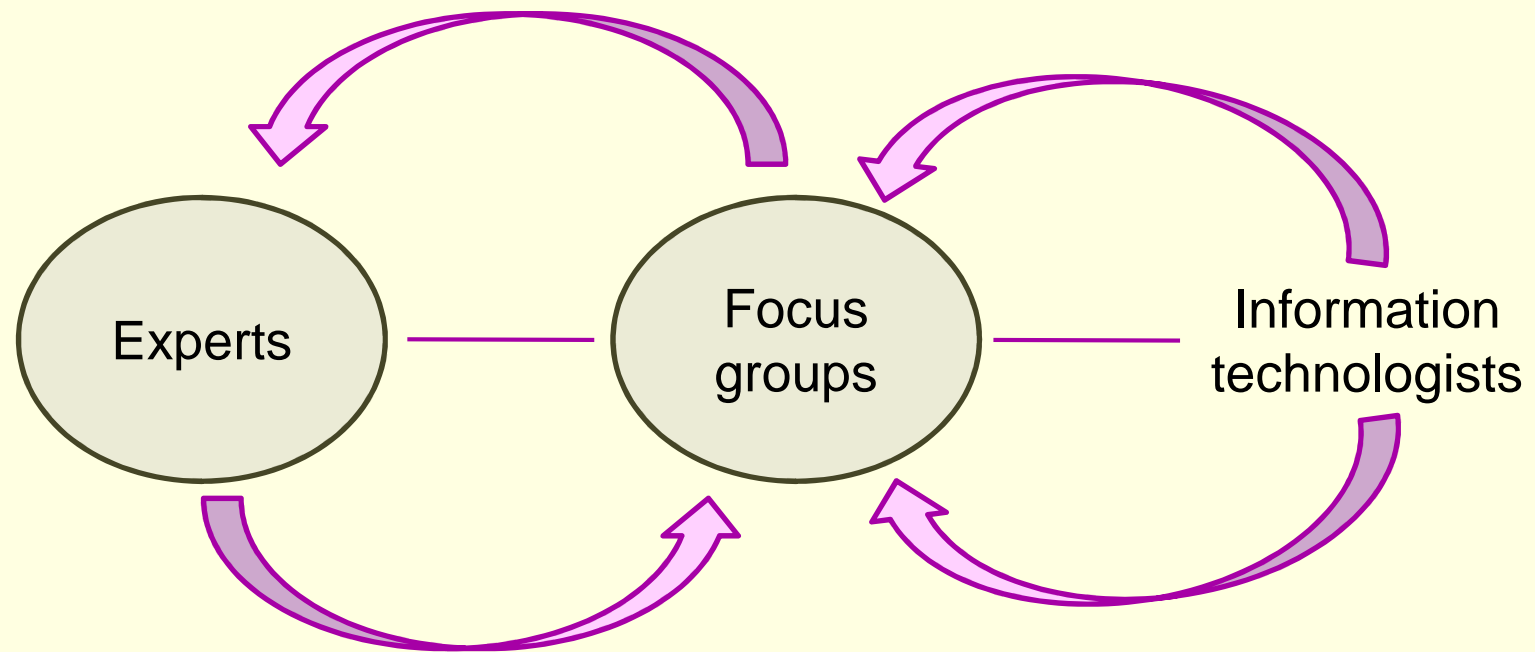

risk perception

“decision conflict”

Ottawa Decision Support Framework

International Patients Decision Aids Standards (IPDAS)

Making-a-decision Aid

Shared decision criteria

- 1. Equipose**
- 2. Not critical**
- 3. Preference sensitive**

Rilpivirine v Efavirenz

Not preference sensitive

- 1. Need ARV**
- 2. Not in renal failure**
- 3. Appropriate vaccination**

Preference sensitive

- 1. Side effect profile**
- 2. Adherence**
- 3. Food requirements**

Patient Centred Outcomes Research

Patient-centered outcomes research (PCOR) helps people and their caregivers communicate and make informed health care decisions, allowing their voices to be heard in assessing the value of health care options. This research answers patient-centered questions such as:

1. "Given my personal characteristics, conditions and preferences, what should I expect will happen to me?"
2. "What are my options and what are the potential benefits and harms of those options?"
3. "What can I do to improve the outcomes that are most important to me?"
4. "How can clinicians and the care delivery systems they work in help me make the best decisions about my health and healthcare?"

Complex predicting individual outcomes

System dynamic analysis

Input: Age
CD4 and slope
Viral load
BMI
Anaemia
Smoking
Framlingham score
Frax score

Systemic dynamic analysis

Rationing

Resources are finite

Implicit rationing → unfair

Doctors have a duty of care to the patients they don't see

Waste avoidance

10% of health care costs are fraud

40% of healthcare costs are “waste”

National commissioning

- Patient centred
- Priority setting using economic evaluations

What do patients want ?

- 1. ? Local care ↔ travel for best care**
- 2. ? Freedom from side affects more important than minor changes in efficacy**
- 3. 3 pills/day v cost (better health care provision)**
- 4. Poorly adherent patients: continue to treat/ no treatment**
- 5. 5 mins every 6/52, 1/2 hr per year**
