1	Full	General	General	BHIVA is concerned that the NICE guidelines make no mention of HIV testing for NHL. All patients should be tested following a diagnosis of NHL as this influences the treatment (requiring antiretrovirals and OI prophylaxis) as per BHIVA malignancy guidelines. BHIVA strongly recommends this in view of the BHIVA (NICE accredited) malignancy guidelines 'BHIVA guidelines for HIV-associated malignancies 2014', <i>HIV Medicine</i> (2014), 15 (Suppl. 2), 1–92. Checklist for submitting comments

- Use this comment form and submit it as a Word document (not a PDF).
- Complete the disclosure about links with, or funding from, the tobacco industry.
- Include page and line number (not section number) of the text each comment is about.
- Combine all comments from your organisation into 1 response. We cannot accept more than 1 response from each organisation.
- Do not paste other tables into this table – type directly into the table.
- Underline and highlight any confidential information or other material that you do not wish to be made public.
- Do not include medical information about yourself or another person from which you or the person could be identified.
- Spell out any abbreviations you use
- For copyright reasons, comment forms do not include attachments such as research articles, letters or leaflets (for copyright reasons). We return comments forms that have attachments without reading them. The stakeholder may resubmit the form without attachments, but it must be received by the deadline.

You can see any guidance that we have produced on topics related to this guideline by checking [NICE Pathways](#).

Note: We reserve the right to summarise and edit comments received during consultations, or not to publish them at all, if we consider the comments are too long, or publication would be unlawful or otherwise inappropriate.
