

17<sup>TH</sup> ANNUAL CONFERENCE OF THE  
BRITISH HIV ASSOCIATION (BHIVA)

British HIV Association  
**BHIVA**

**Dr Jane Ashby**  
Imperial College Healthcare NHS Trust, London

6-8 April 2011, Bournemouth International Centre

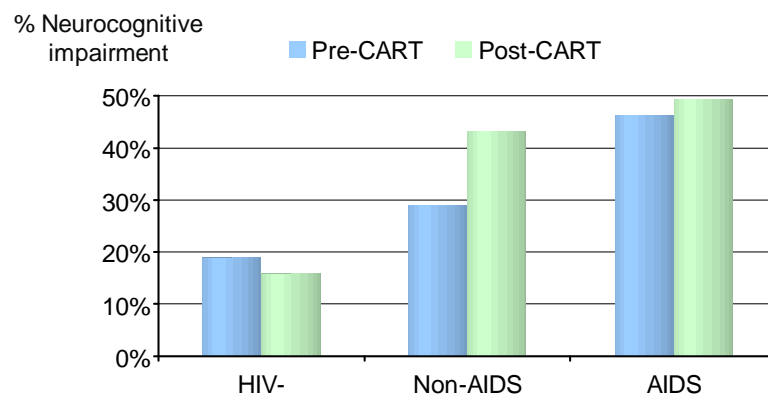

Imperial College  
London

**Cerebral function in perinatally  
HIV infected young people and  
HIV uninfected sibling controls**

**Jane Ashby**, Caroline Foster, Lucy Garvey, Tania Wan,  
Joanna Allsop, Yasotharan Parameswaran, Agnes Kocsis,  
Eleanor Hodgson, Camilla Sanger, Simon D Taylor-Robinson,  
Sarah Fidler and Alan Winston

## Prevalence of neurocognitive impairment in the pre-CART and post-CART eras

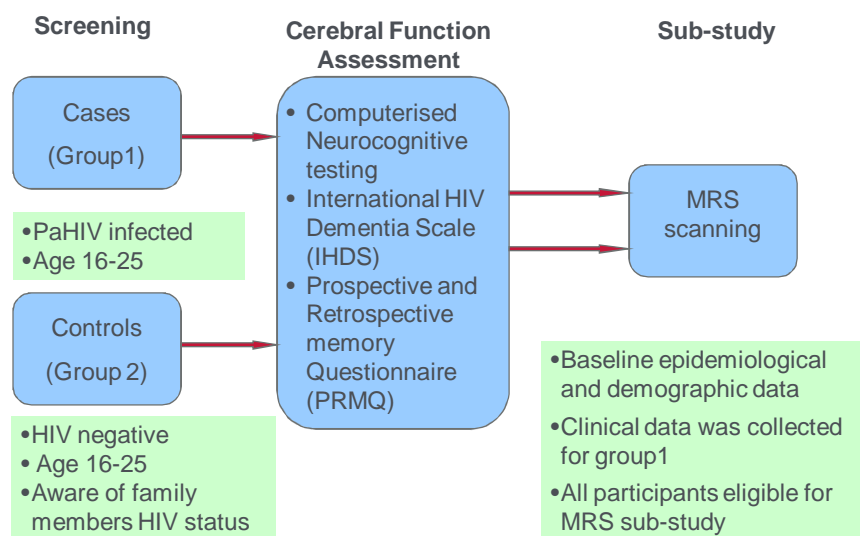

## Effect of perinatal HIV infection on neurocognitive function

## Aim

- The aim of this study was to characterise the neurocognitive functioning of young adults with perinatally acquired HIV (PaHIV) infection and compare with HIV negative siblings or close family members as aged matched controls

## Study schedule

Imperial College  
London

## Computerised neurocognitive testing (Cogstate™)

HAS THE CARD TURNED OVER?

In this task, a playing card will be shown. If you make a mistake you will be penalised. Try to make your response as fast as possible.

Pt presses the 'Yes key' as soon as the blue card has turned over

## IHDS – International HIV dementia scale

**Consists of 3 parts**

- 1. Memory recall of 4 words**

Scored out of 4

1 point for every word remembered
- 2. Tapping fingers**

Scored out of 4

No. of finger tapping complete in 15 secs recorded
- 3. Performing sequence with wrist**

Scored out of 4

No. of times sequence complete in 15 secs recorded

AIDS. 2005 2;19(13):1367-74

## Prospective and Retrospective Memory Questionnaire (PRMQ)

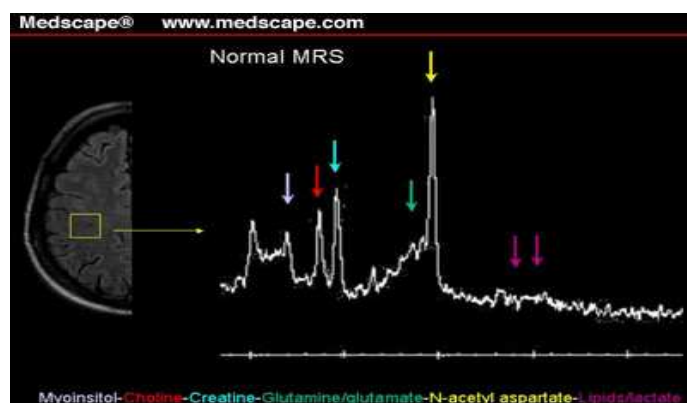

|   | Item (1-16)  | Score<br>1-5 |
|---|--|--------------|
| 1 | Do you decide to do something in a few minutes time and then forget to do it?  |              |
| 2 | Do you fail to recognize a place you have visited before?  |              |
| 3 | Do you fail to do something you were supposed to do a few minutes later, even though it is there in front of you, like take a pill or turn off the kettle? |              |
| 4 | Do you forget something you were told a few minutes before?  |              |

Please score each question with a 5 point scale:

- |              |                |
|--------------|----------------|
| 1. Never     | 4. Quite often |
| 2. Rarely    | 5. Very often  |
| 3. Sometimes |                |

Crawford et al The British Psychology Society 2006. 45, 83-104

## Magnetic Resonance Spectroscopy (MRS)

## Results - Baseline characteristics

| Parameter                         | Group 1   | Group 2   |
|-----------------------------------|-----------|-----------|
| Number of subjects                | 33        | 14        |
| Number of subjects undergoing MRS | 8         | 4         |
| Age, years (mean, range)          | 20, 17-23 | 20, 16-24 |
| Black /Mixed Ethnicity %          | 85        | 86        |
| Male gender, n (%)                | 11 (33)   | 4 (29)    |
| Recent Recreational Drug use (%)  | 2 (6)     | 1(7)      |
| Ever Recreational Drug Use (%)    | 13 (39)   | 6 (43)    |
| English is first Language (%)     | 29 (88)   | 13 (93)   |
| Number of years education (years) | 14        | 15        |

Table legend; Mean values unless otherwise stated

## Results - HIV characteristics

| Parameter                                   | Group 1       |
|---|---------------|
| Current plasma CD4 count (cells/uL, ) (IQR) | 444 (174-725) |
| Current plasma CD4 cell %                   | 21            |
| HIV VL <50 copies/ml, n, (%)                | 18 (55)       |
| Age at HIV Diagnosis, years (IQR)           | 5 (0-9)       |
| Years since HIV diagnosis (IQR)             | 15 (13-20)    |
| Currently taking ARV, n (%)                 | 26 (79)       |
| Age at ARV commencement, years (IQR)        | 13 (8-16)     |
| Years since first ARV treatment (IQR)       | 8.5 (4-13)    |

Table legend; mean values unless otherwise stated.  
IQR= Interquartile range, VL = Viral Load, ARV = Antiretroviral therapy

## Results of cerebral testing

| Domain             | Best Score | Total score (n = 47) | Group 1 (n=34)    | Group 2 (n=14)    | p value*     |
|--------------------|------------|----------------------|-------------------|-------------------|--------------|
| Speed              | low        | 10.64                | 10.66             | 10.57             | 0.27         |
| Executive Function | low        | 17.83                | 18.18             | 17.00             | 0.68         |
| Accuracy           | high       | 3.02                 | 3.03              | 2.99              | 0.78         |
| IHDS               | high       | -                    | 11.3              | 11.3              | 0.861        |
| PRMQ (IQR)         | low        | -                    | <b>42 (36-49)</b> | <b>35 (28-43)</b> | <b>0.023</b> |

Table legend; mean scores unless otherwise stated  
 PRMQ = Prospective and Retrospective Memory Questionnaire,  
 IHDS = International HIV Dementia Scale, IQR= Interquartile range;  
 \*p value for between group differences

## Magnetic Resonance Spectroscopy - Results

|         |         | Best score | Total score | Group 1 (n=8) | Group 2 (n=4) | p value     |
|---------|---------|------------|-------------|---------------|---------------|-------------|
| Right   | Naa/Cr  | High       | 2.01        | 2.13          | 1.77          | 0.17        |
| Basal   | Chol/Cr | Low        | 0.76        | <b>0.83</b>   | <b>0.63</b>   | <b>0.02</b> |
| Ganglia | ml/Cr   | Low        | 3.30        | <b>3.43</b>   | <b>3.03</b>   | <b>0.09</b> |

Inflammation

5/8 patients VL <50

Table legend; Cr = creatine; Chol = choline; MI = myo-inositol; NAA = N-acetyl aspartate, \*p value for between group differences (p < 0.05 shown in bold)

## Conclusions

- Impairment in self reported memory
- Statistically significant increases in cerebral metabolite inflammatory factors
- No differences in computerized neurocognitive testing scores were observed between study groups

## Acknowledgements

- Thank you to the volunteers who participated in the study
- Thank you to all the 900 clinic staff
- Thanks to BHIVA - This study was partly funded from a study grant
